SKILLS

- **Languages:** C, C++, Java, JavaScript, Python
- **Frameworks:** HTML, CSS, NumPy, Pandas, Matplotlib, Scikit-Learn
- **Tools/Platforms:** MySQL, Power BI, Excel, Tableau, GitHub
- **Soft Skills:** Problem-Solving, Discipline, Hardworking, Active Listening

PROJECTS

Car Accident Analysis Dashboard | [GitHub](#)

March - April 2025

- Analyze car accident data in order to identify meaningful patterns related to accident frequency, locations, and severity, and to present these insights through a clear and interactive analytical dashboard.
- Cleaned and prepared raw accident data, performed trend and exploratory analysis on key accident metrics, and designed an interactive Excel dashboard using pivot tables, charts, slicers, and formulas.
- Successfully delivered a dynamic, user-friendly dashboard that clearly highlights high-risk locations, peak accident periods, and severity trends, enabling quick insights and supporting data-driven analysis.

Tech: Excel

Student Management System | [GitHub](#)

November - December 2023

- Develop a web-based student management system that streamlines academic activity tracking and improves accessibility to academic information for both students and teachers through a centralized platform.
- Designed and developed a responsive web application with modules for attendance management, marks display, assignment upload, and performance analytics, along with a clean and intuitive user interface.
- Successfully delivered a user-friendly and efficient student management system that simplifies academic workflows, enhances transparency, and enables smooth interaction between students and teachers.

Tech: HTML, CSS, JavaScript

TRAINING

Summer Training – Basics of DSA

June - July 2025

Lovely Professional University

- To strengthen core Data Structures and Algorithms concepts by applying them to a real-world problem through the development of a skill-based candidate evaluation and shortlisting system using C++.
- Designed and developed a C++ application that allows adding candidates with their skill sets, validates job requirements, calculates skill-match accuracy, generates ranked shortlists.
- Successfully built a data-driven and efficient candidate shortlisting system that automates evaluation, improves accuracy in ranking, and demonstrates practical application of DSA concepts in problem-solving.

Tech: C++

CERTIFICATES

- Basics of DSA | [LPU](#)

June - July 2025

- Mastering C: Basic to Beyond | [CSE Pathshala](#)

February - March 2024

- The Complete Python Course | [Infosys Springboard](#)

January - February 2024

ACHIEVEMENT

Solved **50+ Data Structures and Algorithms problems** on LeetCode, strengthening problem-solving skills across arrays, strings, recursion, hashing, and fundamental algorithms.

December 2025

EDUCATION

- **Lovely Professional University**

Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.5**

Punjab, India

August 2023 - Present

- **Kamala Prasad Singh S.S. School**

Intermediate; **Percentage: 62.8%**

Aurangabad, Bihar

April 2019 - March 2021

- **D.A.V. Public School**

Matriculation; **Percentage: 85.8%**

Aurangabad, Bihar

April 2018 - March 2019
